the story of shifty's karate kid has never really improved upon its source material. some people like it, while others find it too retro. but either way, the duds are back, and this time, the turtles have the technology to film a couple of "lost" sequels. when the turtles are given the chance to do so, they are faced with a dilemma: if they don't accept the offer, they risk losing their chance to save the utroms' home world. so the turtles decide to make the leap and save the day -- but with the added threat of losing their freedom. this new issue of teenage mutant ninja turtles is a solid start. in order to get the turtles into gear, it's business as usual. they take on a few street wise kids who were trying to steal their pizza. while the story tries to set up the next episode of teenage mutant ninja turtles and not just another vehicle for fan service, the issue is a solid read. most of the issues plot is explained, and the new installment even introduces us to the new villains -- the b'ori. the b'ori are a race of aliens who crash landed on the new york city, and while their reasons for attempting to take over the world are unknown, they have a robotic army ready to fight for them. the book itself is a solid read, and it feels a lot more organic than it's other counterparts. on the playstation store, four new ps3 titles are going on sale. the first is littlebigplanet, available for \$14.99. the game can be played alone or as part of the littlebigplanet community. if you do get the game, you can also download the littlebigplanet karting demo for free as part of the full release. dragonquest ii is also on sale at \$14.99, with dragon quest monsters: joker 2 for \$14.99 and ultimate marvel vs. capcom 3 for \$19. the other three games of the week are killzone 3 for \$59.99, god of war for \$49.99 and ninja gaiden ii for \$14. they're all available at the discount price of \$20 or less. 5ec8ef588b
